

How it Works

Sending your patient's scans to O-RAD for reporting is a simple and easy process.

- Click on the Register button and create your account
- Complete the registration form
- Select your Account Type – Total or Select
- Agree to T&C's
- Log in details will be emailed to you for verification
- Create a new order by completing order form with the scan, examination and patient information
- Upload DICOM files for patient. DICOM files must be zipped (compressed) before sending to reduce transfer time. The speed at which files are uploaded is dependent on the speed of your internet connection.
- Add order to cart if processing additional orders
- Click on Pay and Process to send orders to O-RAD for reporting
- Reports are uploaded to Envision Online. To access your reports click on View Reports at the top of the page. For added security, our support team at O-RAD will email a separate username/password for access to your reports.

Please do not hesitate to contact our support team on 08 6382 3888 or info@orad.com.au if you require further assistance.
